PROZATIMNÍ ŘEŠENÍ PRO KARANTÉNI STANY A OŠETŘOVACÍ STANICE

Air Area company s. r. o.
Chlumecká 1539
198 00 Praha 9

Website: www.airarea.cz

Dear Sir or Madam,

Many hospitals globally are confronted with an increasing number of infected corona (COVID-19) patients in the last days and weeks. The number of newly infected patients is increasing daily. The question has already been asked whether hospitals can cope with the number of infected patients who potentially could be admitted in the next few days or weeks, as there is limited space for patients to be accommodated comfortably.

Many customers are resorting to container solutions as an interim measure. Containers offer the advantage of a fast, modular and isolated solution. However, many do not realise that there are also insulated demountable temporary structures and tents on the market that combine the advantages of containers with reusability.

Demountable temporary structures can be purchased or rented complete with interior fittings such as room layouts, heating and sanitary systems and are available in all widths and lengths. Containers are a fixed size and usable only for a single purpose, whereas demountable temporary structures offer a wide range of possible applications.

In this context we would like to introduce ourselves as a leading manufacturer of temporary and semi-permanent buildings and provider of complete solutions for the above-mentioned purposes. In this brochure we would like to give you an insight into our product portfolio and solutions.

We hope that this brochure is of interest to you. For further information please contact our competent team of experts that are available to you at any time.

Simply contact us via:

telephone: +420 608 907 904

E-mail: roman.slavcev@hts-tentiq.com

We are looking forward to assisting you.

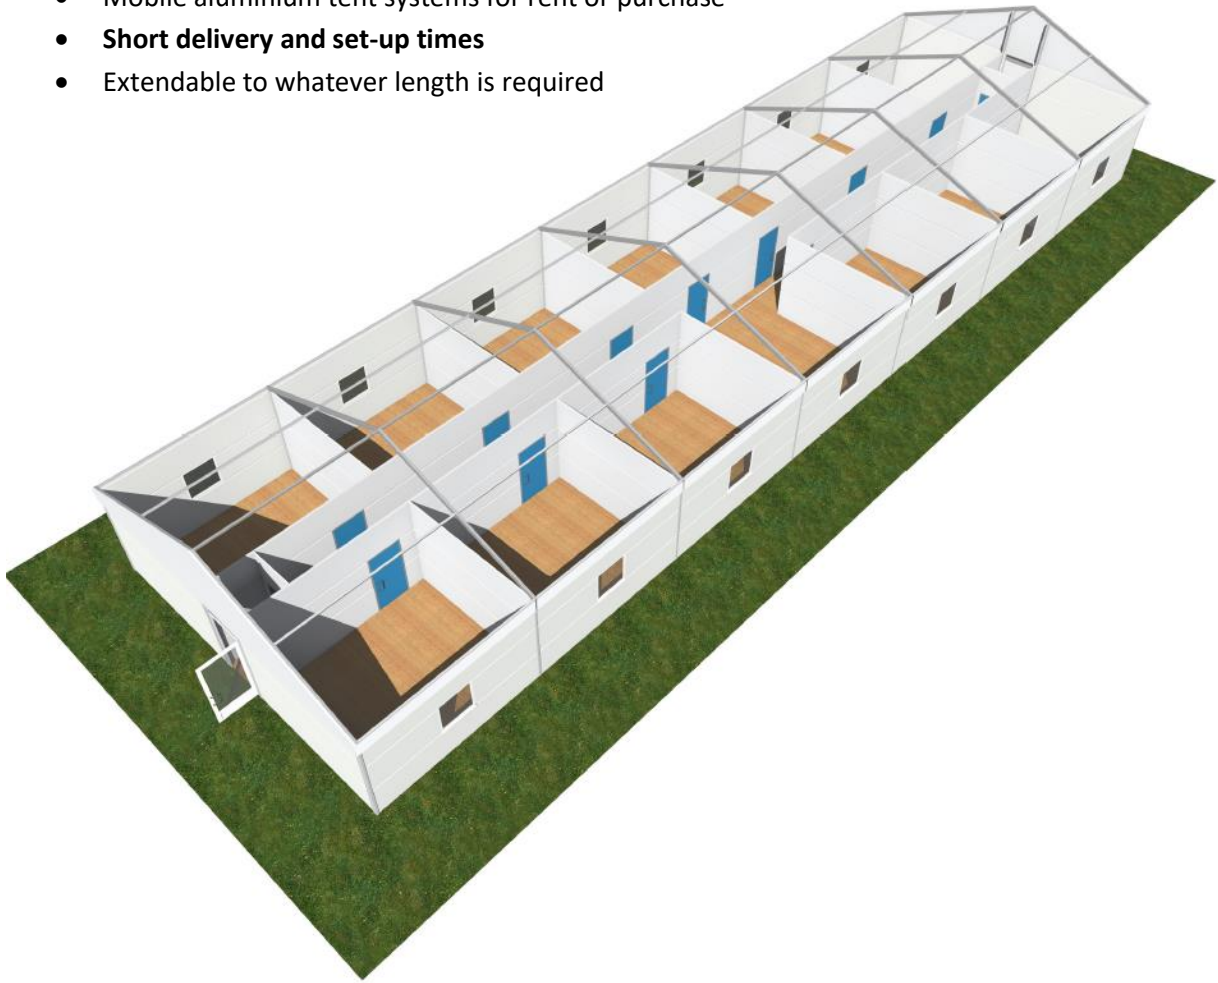

With kind regards

Roman Slavcev

HTS tentiq GmbH

OUR SOLUTION

- Mobile aluminium tent systems for rent or purchase
- **Short delivery and set-up times**
- Extendable to whatever length is required

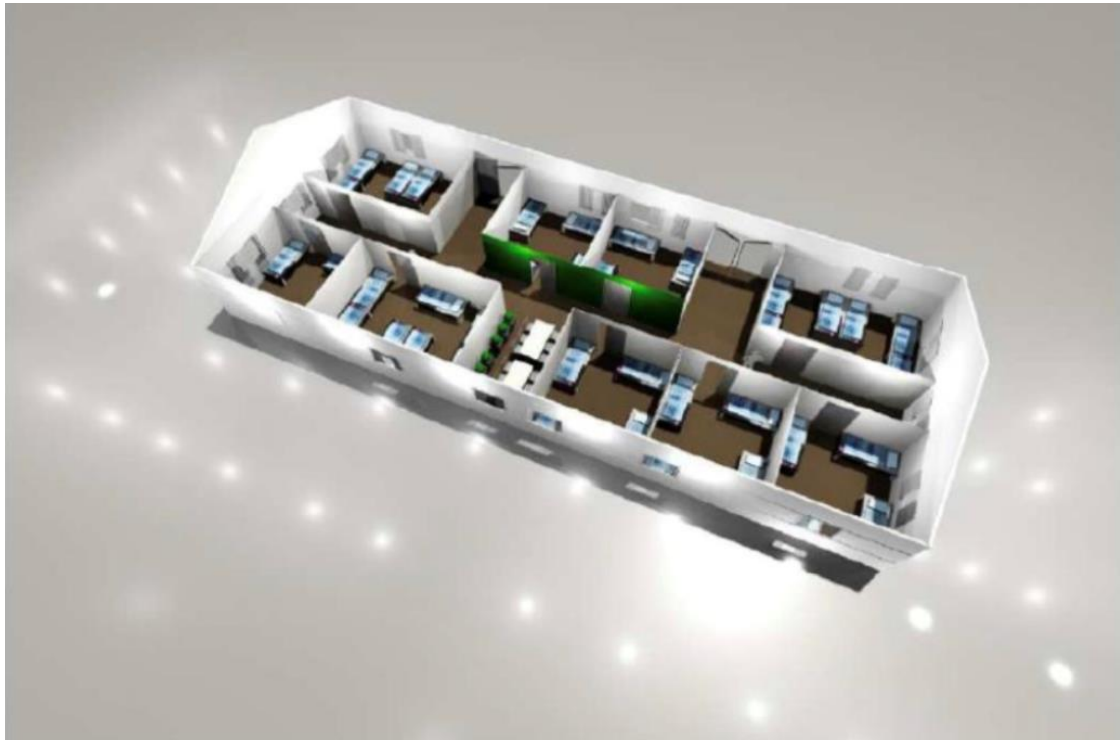

TENT TREATMENT STATIONS & SLUICES

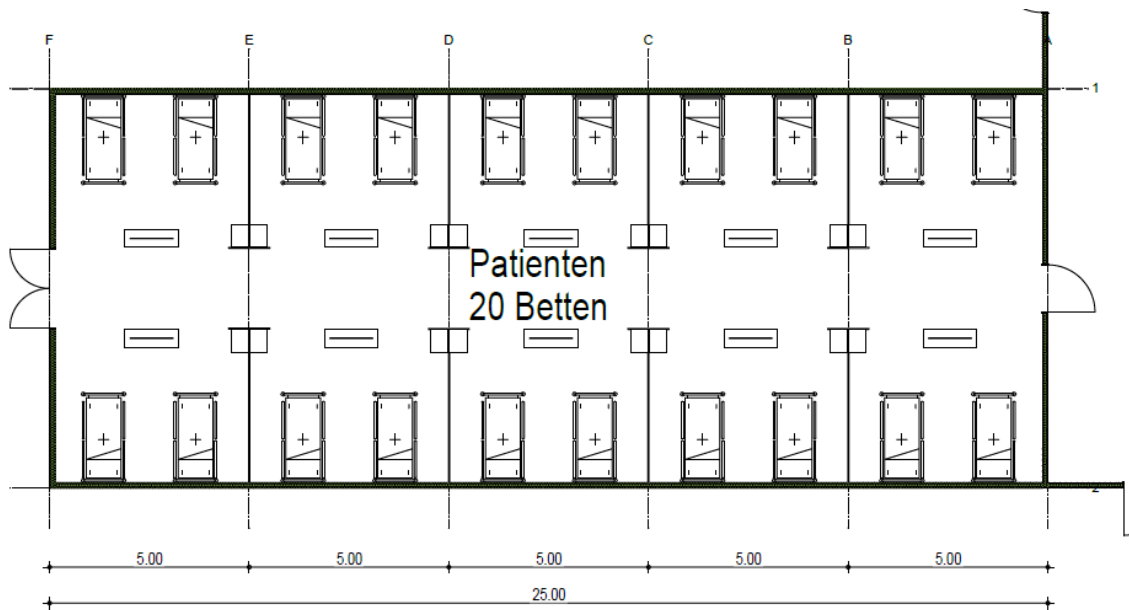

TEMPORARY STRUCTURE FOR ACCOMODATION - INTERNAL VIEW

- Version (B) 10.00 x (L) 25.00m
- for 45 People
- 9 living rooms with 4-7 beds
- 1 meeting area

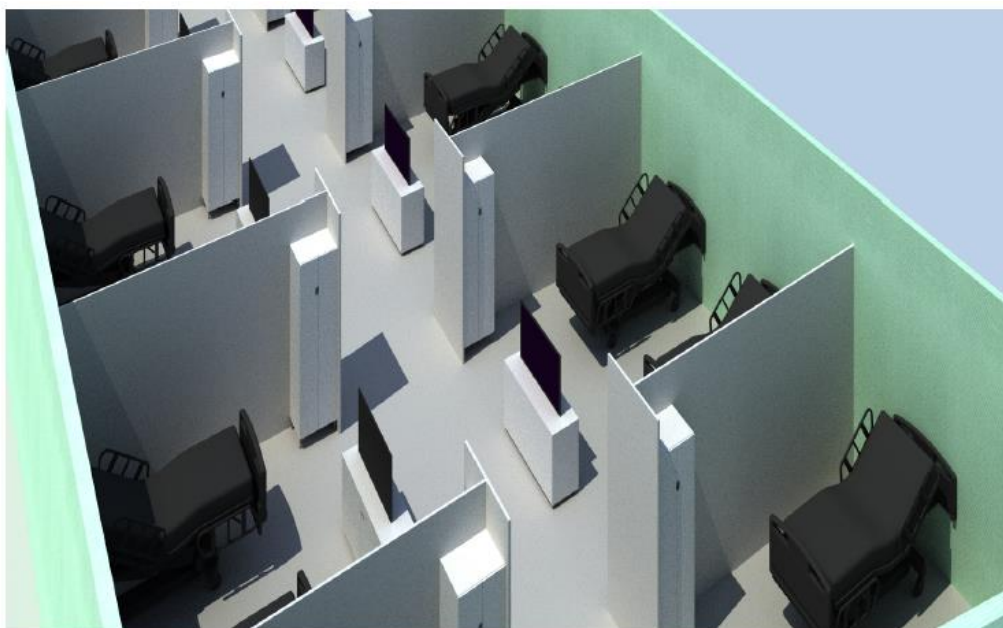

TEMPORARY STRUCTURE FOR ACCOMODATION - INTERNAL VIEW

- Version (B) 10.00 x (L) 25.00m
- For 20 people
- 10 living rooms with 2 beds

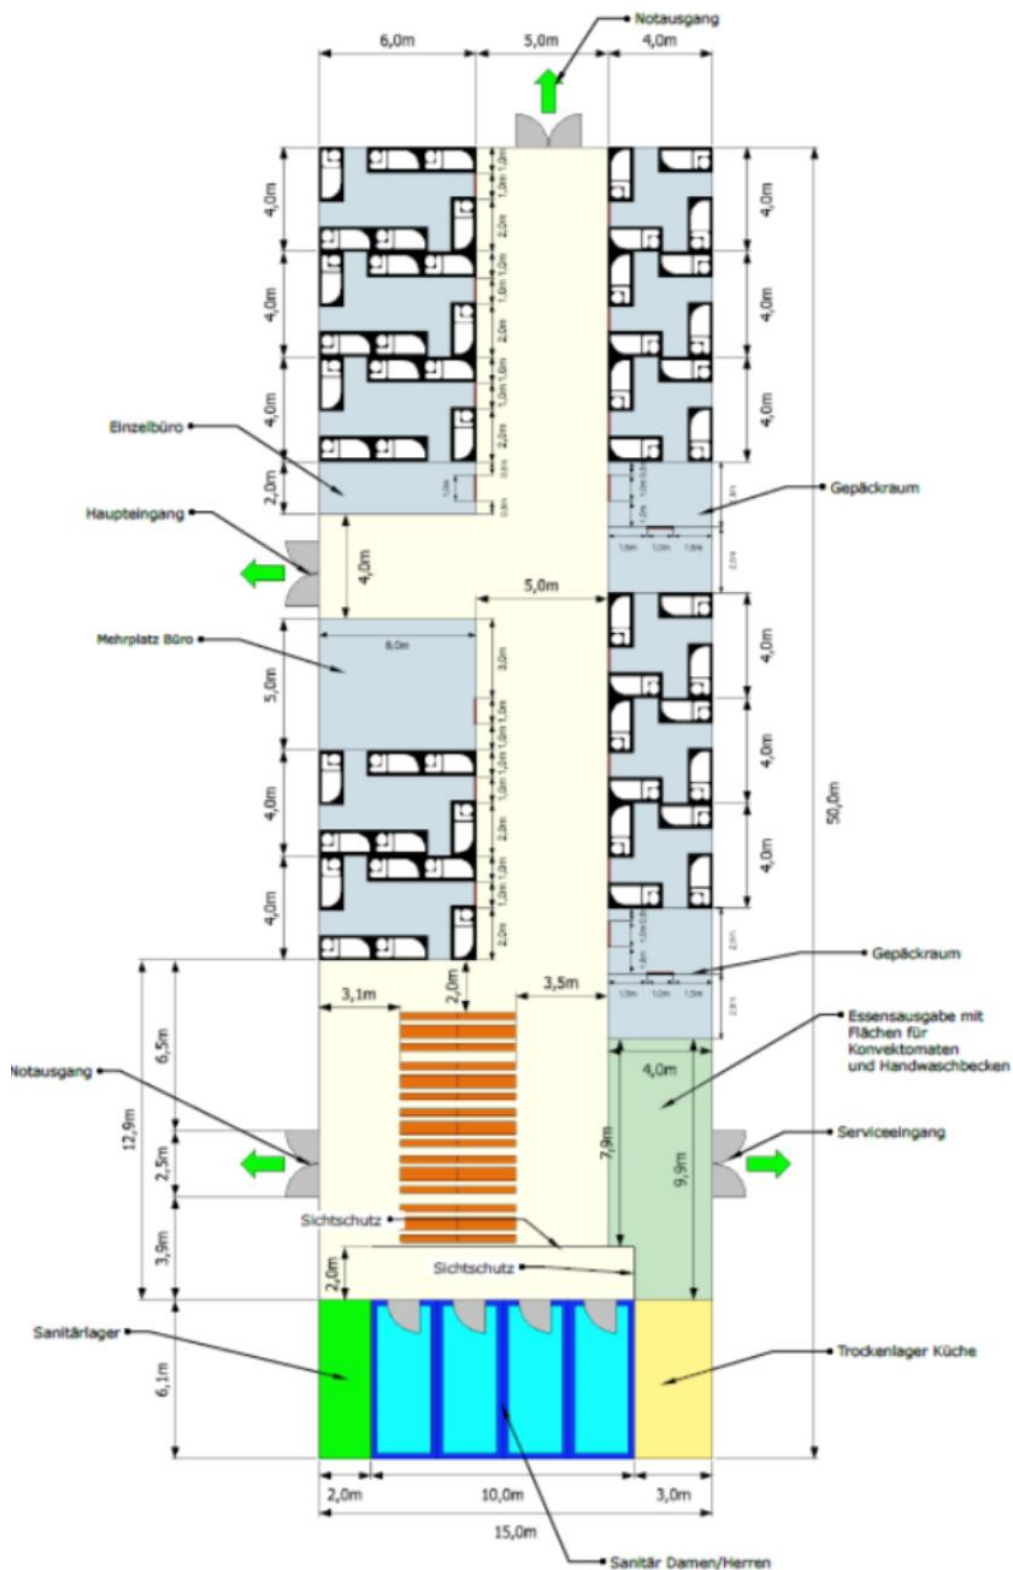

Example diagram:

TEMPORARY STRUCTURE FOR ACCOMODATION - INTERNAL VIEW

- Version (B) 15.00 x (L) 50.00m

RAPID DEPLOYMENT SHELTER

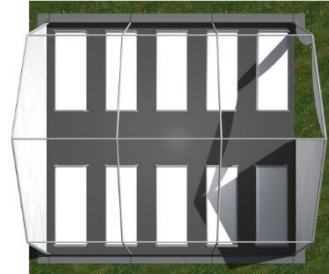

- Different sizes available
- over 100 units from stock immediately available
- from 1,100 € net, plus VAT and freight costs
- assembled and ready for use within minutes
- Assembly without special tools and without previous knowledge

Model example: UKMZ P10 (4.75 x 5.00m)

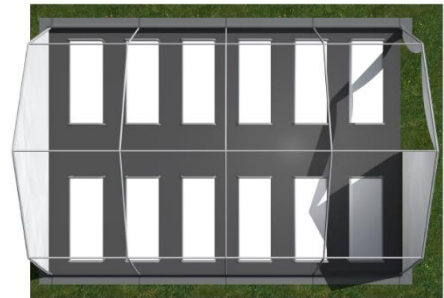

RAPID DEPLOYMENT SHELTER

Model example: UKMZ P13 (5.90 x 6.00m)

Model example: UKMZ P17 (5.90 x 8.00m)

Model example: UKMZ P21 (5.90 x 10.00m)

HTS tentiQ GmbH

HTS tentiQ is a globally recognised temporary structure manufacturer and supplier you can trust, providing choice, quality, global reach and innovation to customers the world over. The company combines the customer focus of a family run business with pioneering design innovation and advanced production processes.

HTS tentiQ was launched in 2001 by Heinz Röder, an industry innovator who was able to invest almost half a century of experience and knowledge into the set up and growth of the business.

Today, HTS tentiQ is considered a leading supplier in the temporary structures industry, supplying one of the largest and most diverse selections of temporary and semi-permanent event tents and temporary structures to private and public sectors worldwide

In our 4 production buildings on a factory site of more than 64,000 m² we manufacture self-supporting structures with a span of up to 60.00 m. The entire production is carried out with the help of CNC-controlled machines which enables us to achieve precise production at low costs

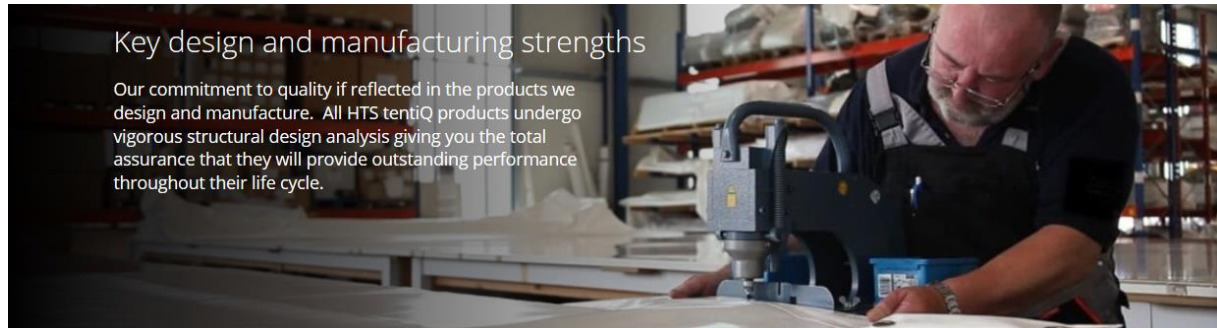

The company currently employs a highly skilled and trained workforce of more than 170 people at the Kefenrod site, with the majority having been employed by HTS tentiQ since its early days. This includes a 50+ strong team of global sales experts, strategically placed to cover most global regions and provide local support, supply, distribution and installation.

German Quality 

All products are designed and manufactured by HTS tentiQ in Germany. Components are CNC machined and finished by hand and all structures produced and fully certified to European Standards.

HTS tentiQ GmbH

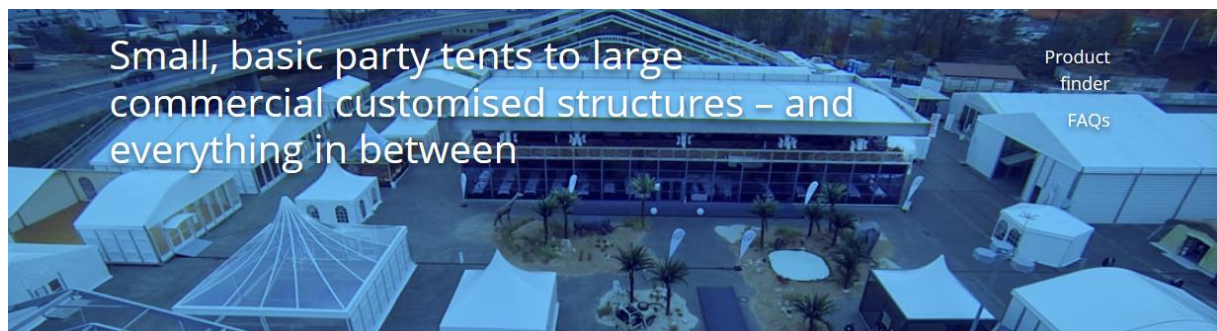

Key design and manufacturing strengths

Our commitment to quality is reflected in the products we design and manufacture. All HTS tentiQ products undergo vigorous structural design analysis giving you the total assurance that they will provide outstanding performance throughout their life cycle.

HTS tentiQ products are designed, developed and manufactured at our ISO 9001:2015 certified production facility located in Kefenrod, Germany. Innovation and technology are at the forefront of the company philosophy.

- The company operates from a 64,000m², state-of-the-art production facility designed and constructed specifically for the high-volume manufacture of our diverse range of temporary structure systems and accessory products.
- The facility has the capability and capacity to operate 24 hours per day enabling a production output of up to 60,000 m² of finished temporary structure product per week.
- All primary frame components (uprights, beams, purlins and gable framework) are manufactured on one of six, high-speed CNC, 5-axis (Computer Numerically Controlled) robotic machines. These advanced production methods offer a degree of precision manufacturing accuracy second to none, resulting in a perfectly engineered end product.
- All frame components are subject to stringent quality control and final inspection procedures. Following final inspection, products are packed, banded and prepared for customer dispatch.
- The new CNC-controlled cover production facility is equipped with the latest machines. This makes it possible to produce tent covers of the highest quality within a very short time.

Small, basic party tents to large commercial customised structures – and everything in between

OUR SYSTEMS

Over the years, our constructions have developed from the well-known aluminium tent with a gable roof to ultra-modern buildings with visually attractive shapes, state-of-the-art thermal insulation and current safety standards for scaffolding and cladding - all of this, of course, always under the premise of rapid assembly and disassembly. For the user, our buildings are nowadays hardly distinguishable from fixed buildings.

Our product portfolio ranges from classic festival tents to storage tents, accommodation tents, hangars and individually designed space solutions. A competent design department and the technical know-how allow us to develop tailor-made solutions for any requirements. Here is a short selection from our product range:

Temporary Cover for Hotel Swimming Pool

Temporary hotel conference and event structure

Wynyard Hall Permanent and Grand Marquee

Clearspan Event Marquee for Prestigious Awards Event

2 Storey Hospitality Structure for Promotional Test Drive Event

Over 100 Temporary Marquees for FIFA World Cup Russia 2018

Temporary structure required for football club hospitality area

Luxury 2-Storey Sales Office Structure on Miami Beach Millionaire's Row

VIP Multi-level Structure
