

RÖDER HTS HÖCKER GmbH ♦ Hinter der Schlagmühle 1 ♦ 63699 Kefenrod

Manufacturer's information: New joining elements in our products

Because of our CE-certification according to EN 1090 we had to make some changes regarding the specifications of our joining elements. All our products will from now on be delivered with SB-sets.

SB is short for "Structural Bolting" meaning screws and nuts that are produced according to CE-standard for joining elements and are marked with "CE".

Washers do not have to be marked with "CE".

The norm EN 15048 defines the use of non-pre-stressed screw joints. A set consists of screw and nut that have the same surface coating.

Please do not mix SB-sets with existing screws and nuts in your inventory. The threads might not fit and the screw has different surface coatings. This might cause corrosion when joined together with a nut with a different surfaced treatment.

Tent type	Date that the changes take effect	Additional Information
Pagodas	10.02.2015	
Party tents	10.02.2015	
Big tents	19.03.2015	
Military tents	10.02.2015	
Industrial structures	19.03.2015	
Multi level structures	19.03.2015	

updated: 03.02.2015
